Marcil Technologies Inc. Releases Project Accounting and Xpede.NET 10.0.2.0

FARGO, N.D.—May 2009— Marcil Technologies Inc. today announces the release of WorkforceROI Project Accounting and Xpede.NET 10.0.2.0. This release is compatible with Microsoft Dynamics GP 10.0 SP 3 or higher. This release is a culmination of enhancements to many areas of the products. It also includes the addition of requisitions, which will allow for the creation of project-related requisitions that can be transferred to Purchase Order Processing.

WorkforceROI Project Accounting with Xpede.NET provides professional services organizations with a full suite of project costing and management tools, accessible via the GP Financials or web-based capabilities. Offering near real-time access to information, these organizations can make informed decisions on their projects that will give a positive impact on their bottom line.
