Marcil Technologies Releases Project Accounting Version 10.0.1.0

FARGO, N.D.—May 2008— Marcil Technologies today announces the general release of WorkforceROI Project Accounting 10.0.1.0. This release is compatible with Microsoft Business Solutions Dynamics GP 10.0. This release is a culmination of enhancements to many areas of our product.

WorkforceROI Project Accounting with Xpede.NET provides professional services organizations with a full suite of project costing and management tools, accessible via the Great Plains Financials or web-based capabilities. Offering near real-time access to information, these organizations can make informed decisions on their projects that will give a positive impact on their bottom line.

Marcil Technologies is proud to announce our Resource Management module available with this release. Resource Management allows Project Managers to schedule out resources by project based on resource skills and proficiencies. Schedules are created in Xpede.NET and can be newly created or copied from previously saved schedules. Contact sales@marciltechnologies.com for additional information and registration keys.
